

|  |            |
|--|------------|
| 12.5 Implementations of maps using hash tables             | 332        |
| Summary  | 334        |
| Exercises  | 334        |
| <b>13 Priority-Queue Abstract Data Types</b>               | <b>337</b> |
| 13.1 The concept of a priority queue                       | 337        |
| 13.2 Applications of priority queues                       | 338        |
| 13.3 A priority-queue abstract data type                   | 339        |
| 13.4 Implementations of priority queues using linked lists | 341        |
| 13.5 The heap data structure                               | 344        |
| 13.6 Implementation of priority queues using heaps         | 355        |
| 13.7 Case study: an improved traffic simulator             | 355        |
| Summary  | 361        |
| Exercises  | 363        |
| <b>14 Tree Abstract Data Types</b>                         | <b>366</b> |
| 14.1 The concept of a tree                                 | 366        |
| 14.2 Applications of trees                                 | 367        |
| 14.3 A tree abstract data type                             | 369        |
| 14.4 A linked implementation of trees                      | 369        |
| 14.5 Specialized tree abstract data types                  | 378        |
| 14.6 Case study: game playing                              | 381        |
| Summary  | 394        |
| Exercises  | 395        |
| <b>15 Graph Abstract Data Types</b>                        | <b>397</b> |
| 15.1 The concept of a graph                                | 397        |
| 15.2 Applications of graphs                                | 399        |
| 15.3 Graph abstract data types                             | 400        |
| 15.4 Edge-set representation of graphs                     | 403        |
| 15.5 Adjacency-set representation of graphs                | 408        |
| 15.6 Adjacency-matrix representation of graphs             | 413        |
| 15.7 Graph traversal                                       | 415        |
| 15.8 Topological sort                                      | 420        |
| 15.9 Case study: material requirements planning            | 422        |
| Summary  | 431        |
| Exercises  | 431        |
| <b>16 Balanced Search Tree Data Structures</b>             | <b>435</b> |
| 16.1 AVL-trees   | 435        |
| 16.2 B-trees   | 447        |
| Summary  | 466        |
| Exercises  | 467        |
