

17 Conclusion	469
17.1 Abstract data types and object-oriented design	469
17.2 Abstract data types as reusable software components	471
17.3 Homogeneous and heterogeneous collections	472
17.4 Extending Java with parameterized classes	476
17.5 Case study: a student record system revisited	477
Summary	482
Exercises	482
A Summary of Mathematics for Algorithm Analysis	484
A.1 Powers	484
A.2 Logarithms	486
A.3 Series summations	487
A.4 Recurrences	488
A.5 O -notation	490
B Summary of Java	495
B.1 Basics	495
B.2 Classes	498
B.3 Interfaces	506
B.4 Packages	509
B.5 Exceptions	510
B.6 Inner classes and inner interfaces	514
C Summary of the Java Collections Framework	517
C.1 Collections	517
C.2 Lists	520
C.3 Sets	524
C.4 Maps	528
C.5 Orderings	533
C.6 Iterators	534
